THE BILLING COLLEGE

Advanced NGOSS Education Curriculum

- Our goal is to provide you with training in advanced lifecycle concepts and custom designed workshops where you will develop your own company's NGOSS based solution
- We work with you to analyze your needs and select the project that will be most beneficial for your company's long term goals. Our Advanced Workshops focus on building:
 - The Business Contract
 - The System Contract
 - The Implementation Contract
 - The Deployment Contract
- Each workshop ranges from 3 to 5 days depending on the scope of your selected project
- The end results:
 - Your own fully documented NGOSS based solution
 - A template for additional implementations
 - Smoother, more efficient operations
- **The Billing College** prides itself on its customer service. We're there for you long after the course and workshops have ended. We are your long-term partners in telecom training

Call today for a proposal developed around your company's specialized needs and goals.
